Air Purifiers

Control Panel

Power

Switch on/off the device

Fan Speed:

Sleep: fan speed is automatically adjusted to low level. Control panel dim lights. The air purifier will not beep.

Low: the fan speed is low

High: the fan speed is high

Auto: The unit will operate automatically according to the indoor air quality. The fan speed is faster when the particulate level is high, and it will decrease when the air quality improves.

Child Lock:

Press this button in order to activate the child lock function. The child lock indicator light will turn on. Other buttons do not work.

Timer:

Press timer button to set the time at 1, 2, 4 and 8 hours.

Filter replacement reminder:

When you turn on the unit, it begins to calculate the filter usage time. The filter life time is about 2000 hours, every time you turn on the unit, you will hear 3 beeps, the filter LED will keep flashing.

After replacing the filter, press the Filter button for 5 seconds, after 3 beeps, the filter LED is off, the unit starts to recalculate the filter time again.

LED Colour: to show the quality's air level
